Subject:Heavy Tow Capacity

Commissioner,

The need for heavy equipment (truck/tractor) tow capacity is still needed at the Coutts Border blockade. We currently have one heavy unit available from the City of Edmonton, and one light unit and flatbed from the Calgary Police Service. All other efforts in Alberta have been exhausted as well as efforts in neighboring provinces. JSG has scanned the country for units to lease, rent or purchase and this too has come up negative. Can we please go back to CAF to obtain S.38 heavy units (with operators) which they indicate they possess. The Premier is very upset and has indicated he will be reaching into Federal Ministers today. Ultimately we will need more resources of the same but we do need these to be staged and available.

Thanks,..Curtis
